

# DUT-E

## ATS-1 automatic tank calibration station

### Quick automatic calibration of fuel tank with high accuracy

Tank calibration table is saved directly to sensor's memory (only for DUT-E, DUT-E GSM, DUT-E 2Bio).

Speeds up tank calibration by 2-3 times.

"Human reliability" does not affect accuracy of calibration.

Calibration control from smartphone over Bluetooth.

Mobile app for calibration station can be downloaded from Google App store.

Two operation modes – automatic and semi-automatic

Autoshutdown in event of pressure/temperature excess.

Delivery set includes filling and suction hoses with camlock fittings.

### Example: calibration of 500-liter fuel tank

ATS-1, automatic mode: ⌚ 20 minutes

Technician, calibration at gas station: ⌚ 40 minutes

Technician, calibration with canister: ⌚ 60 minutes

### Specifications

Tank calibration speed	1500 l/h
Relative inaccuracy of calibration	less than 0,5%
Dimensions (LxWxH)	700x335x335 mm
Weight of ATS-1 set*	23 ... 27 kg

\* delivery set includes suction hose, filling hose with fuel nozzle, fuel sensor cable extender.
