

FMSCrocodile contactless gateway

Advantages

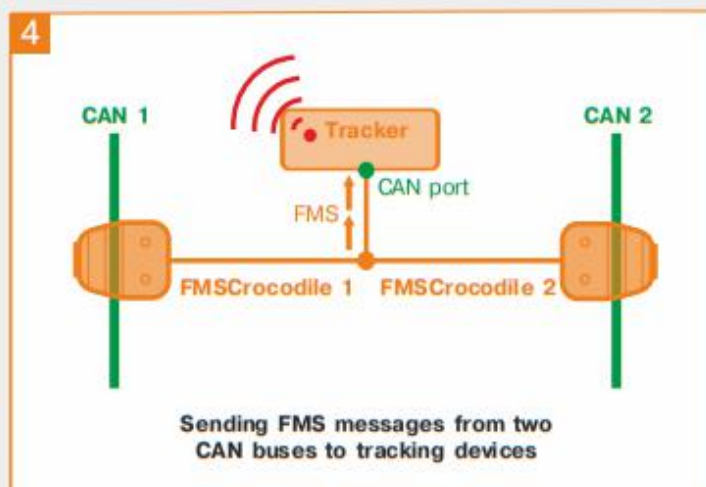

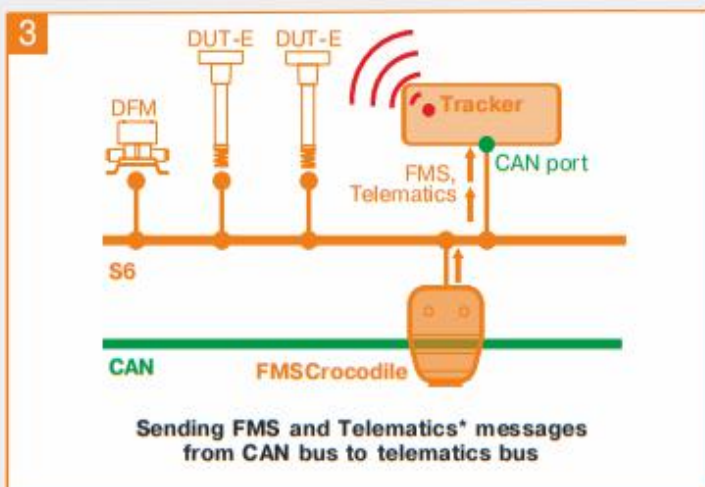

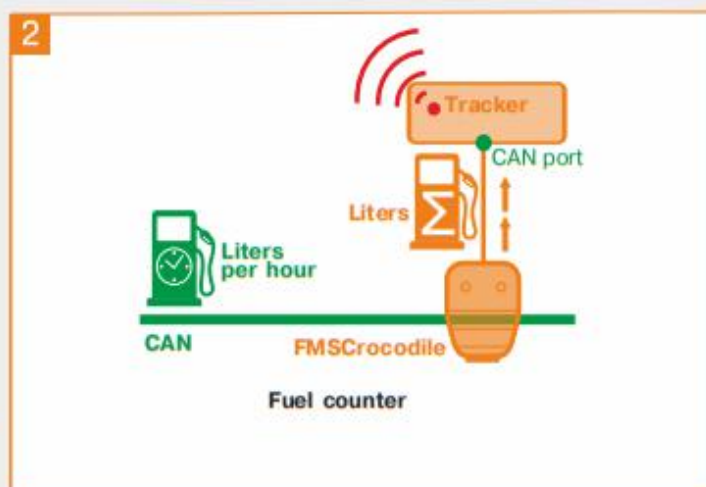

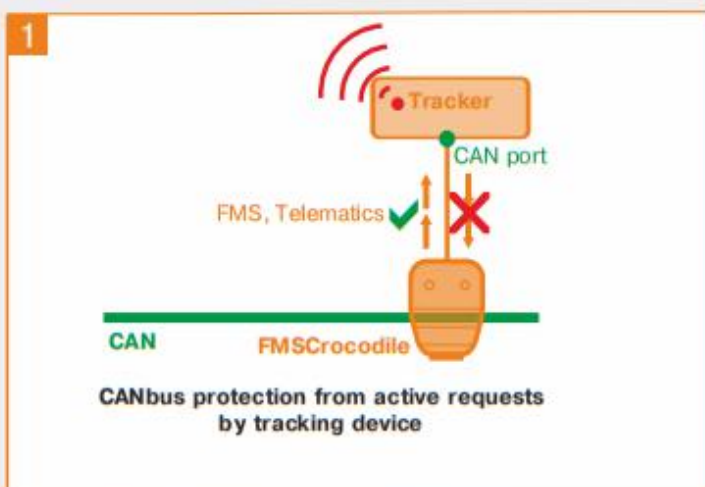

**Multifunctional tool
for automotive CANbus
processing**

**Two in one device –
contactless reader and FMS gateway**

- No configuration required.
- Easy connected and firmly fastened to CANH and CANL wires.
- Power-supplied from onboard electrical network.
- Protected from polarity reversal and interferences in onboard network.

**Input – CAN (J1939)
Output – CAN/S6 (FMS, Telematics)**

Application

* Telematics messages contain most important information on vehicle operation.
FMS gateway gathers messages by scanning CAN bus.
